

Java Software Developers

Regulatory Data Corporation (RDC), has the world's most comprehensive risk relevant information database, GRID, and is rapidly becoming the trusted leader in risk due diligence and AML compliance solutions. Due to our rapid growth and expansion we have multiple openings for junior, mid and senior level Java developers.

We're looking for enthusiastic self-starters to join our highly capable software engineering team. Ideal candidates will have passion for software development, be knowledgeable about industry best practices, be dedicated to continuous improvement, and have the ability to deliver quality software. Candidates must be able to communicate clearly and directly. They should possess a willingness to learn from others and to share their knowledge with their peers.

Job Description:

At RDC our Java developers work on the RDC core platform, enterprise solution framework, internal business applications, and client-facing web applications.

A developer may also work on projects involving client integration. Such projects involve working with clients to determine an approach best suited to integrate RDC solutions into a client platform using a variety of mechanisms (including web services, web interfaces, and batch files).

Additional responsibilities may include maintenance of existing or development of new web scrapers built using an existing, internally developed framework.

A developer is also expected to contribute to requirements gathering, technical specifications, and design documentation.

Qualifications:

- * Strong understanding of Java
- * Familiarity with Spring
- * Familiarity with Maven 2 or 3
- * Experience with relational databases, including a solid understanding of SQL
- * Nontrivial experience with at least one web framework (such as Struts 2)
- * Nontrivial experience working with an SCM system (Subversion and CVS etc.)
- * Good communication skills
- * Ability to work well both independently and in small teams
- * Can-do attitude, and the drive to make a difference in a growing and fast paced organization

Additionally Desired:

- * Familiarity with JEE technologies (especially JMS)
- * Secure coding practices and good understanding of software security issues
- * Working knowledge of XML technologies, including XML Schema and XSLT (JAXB a +)

- * Working knowledge of regular expressions (experience with multiple flavors a plus)
- * Nontrivial experience with Groovy a plus
- * Nontrivial experience with iBatis, Hibernate or JPA a plus
- * Object-Oriented Analysis and Design (OOAD) skills a plus
- * Unix/Linux shell scripting experience a plus (sh, bash, ksh, etc.)
- * Nontrivial Unix/Linux development and/or sys admin experience a plus
- * Experience writing automated unit tests and/or integration tests a plus

These are full time positions with a competitive salary located in the Greater Philadelphia area. At RDC we offer a comprehensive, full-time benefits package that offers medical/dental/vision, life insurance, short/long-term disability, 401(k), flexible spending accounts and more.

Interested candidates should submit their resumes with salary requirement to cbeynon@rdc.com or fax to 610-270-9675 or mail to 2540 Renaissance Blvd., Suite 200, King of Prussia, PA 19406 or submit through our website at www.rdc.com

At this time we are unable to offer H1-B sponsorship, and are not accepting consulting arrangement.

RDC is an equal opportunity/affirmative action employer
